

YOUR PROJECT
OUR EXPERIENCE

**BLACK
CEILING SYSTEMS**

A wide-angle photograph of a modern interior space, likely a cafe or office lounge. The ceiling is a prominent feature, consisting of large, dark, rectangular panels. In the center, a large, illuminated, abstract light fixture hangs from the ceiling. The walls are lined with tall, wooden planters containing various green plants. In the foreground, a long, dark table is supported by a metal frame, with several wooden stools with green cushions arranged around it. The overall atmosphere is sophisticated and contemporary.

MAKE A LASTING IMPRESSION

Choose a black ceiling to transform the appearance of a room, providing sophistication and elegance.

An intimate and cosy atmosphere results from the lower light levels, creating a space that allows people to fully immerse themselves. Black ceilings make a statement, transforming the conventional into a high-end, modern look.

Floating elements, such as canopies and baffles play with light and shadows, and create drama, putting the focus on where it needs to be. When you enhance the darkness, you emphasise the light – creating a powerful contrast. A black ceiling works with industrial, contemporary or urban styles, and remains a timeless option. It's a choice that will make a lasting impression on those who experience your space.

Black ceilings are not only easy to maintain, but are available in a variety of hues and materials to meet the acoustic demands of any space. Make a bold choice that will enhance your space, with black ceiling solutions.

2 Mesh F-L 601 RB35 + Black Perimeter Trim

3 Colortone Neeva + Prelude 24 XL²

4 Optima L Canopy Square & Large Rectangle

5 Cellio C49 + Prelude 15 TL

6 Colortone Fine Fissured + Prelude 24 TL²

YOUR PROJECT:

1 SHARED AREA / OPEN SPACE

Black is bold and black is subtle. Opting for it will make a room feel more intimate, bringing a warm and cosy feel, even in expansive areas. Shared spaces benefit from sound absorbing ceilings, and by selecting a black ceiling solution with great acoustic properties you will make your room look stylish, and ensure it is fit for function.

2 CORRIDOR / CIRCULATION AREA

Circulation areas are far more than just people getting from point A to point B. They are a destination where people converse, wander or even forge their first impressions. Black ceilings can zone rooms and buildings, adding an aesthetic that makes a lasting impression on those who walk the corridors daily.

3 CINEMA / THEATRE / CONCERT HALL

In large venues, the focus is always on what's happening in front of you, not above you. Being able to blend into the surroundings and provide good sound performances is crucial. A black acoustic ceiling system will deliver the best visitor experience, whilst the dimmer light levels put the focus on where it's supposed to be.

4 BAR / RESTAURANT / NIGHTCLUB

A black ceiling will enhance a social setting, with a dim ambience providing the privacy that allows people to connect. To maintain this intimate atmosphere in a busy space, a dark ceiling with good acoustic properties will allow people to socialise with fewer distractions. Black ceiling systems provide low light levels, and with the appropriate sound absorption qualities, you can turn down the noise and create a refined atmosphere.

5 LOBBY / RECEPTION

Black ceilings can make a statement that people will remember. They create a high-end visual and a contemporary look, enhancing the overall aesthetic of your reception area. By selecting tiles with sound absorbing properties, you can reduce noise levels in these high-traffic areas, and by using canopies you can define a lobby by highlighting key areas for visitors, whilst creating an eye-catching design that will make your lobby memorable.

6 RETAIL / DEPARTMENT STORE

Black is timeless, representing class and sophistication. A black ceiling introduces a high-end ambience, providing customers with a feeling of luxury that makes them embrace their shopping experience. Canopies can highlight customer service areas, so navigating a shop is even more straightforward.

OUR RECOMMENDATION:

- Floating ceilings
- Colortone Neeva
- Colortone Fine Fissured
- Black suspension systems

- Metal Corridor range
- Mesh ceilings
- Metal F-Clip Access
- Black suspension systems

- Colortone Neeva
- Colortone Fine Fissured
- Black suspension systems

- Metal ceilings
- Floating ceilings
- Metal Baffles V-P 500

- Open Cell Metal ceilings
- Floating ceilings
- Mesh ceilings
- Black suspension systems

RAL and NCS colours available on request.

YOUR PROJECT OUR EXPERIENCE

However unique the design,
together we will achieve your ambitions

DESIGN THAT WORKS

From collaborative design to budgeting, from pre-construction to on-site installation and technical support, our **project teams** across Europe can engineer your inspiration, and tailor it into a truly unique space.

**CONTACT US
TO KNOW MORE.**

1

multi-material approach

to face every design or architectural challenge

6

plants across EMEA

providing a best-in-class service and reduce carbon footprint

7

Your Project Design Centres

with dedicated project-led teams in the Czech Republic, France, Netherlands, Poland, Russia, Switzerland and the Middle-East to deliver a customised experience across the entire EMEA region

70%

of our portfolio is C2C Certified[®]

to guarantee material transparency and meet the growing demand for healthy sustainable materials

100%

customer focused

with over 150 years experience in delivering prestigious projects to you around the world

925

products in 96 BIM files (Revit & ArchiCAD)

to unleash your creativity
